

# Looking for New Indications

Do you have an idea for a new indication using Bayer compounds?

Bayer is promoting the exploration of new indications by offering grants and further financial support.

**Grants4Indications™**

## Advance your research supported by Bayer

Bayer promotes the exploration of new indications and offers grants and further financial support for promising proposals.

### Your New Indication for a Bayer Compound

Grants4Indications™ is a platform for you to submit your ideas on a specific non-clinical or clinical research project to evaluate a Bayer compound and potentially discover a new therapy for patients

If successful in the first stage, you will be invited to send your full study proposal on the intended research and will receive a grant for this purpose\*. If successful in the next stage, you can receive further funding to conduct the study under an Investigator-Initiated Research (IIR) agreement.

\*if in accordance with your local laws and compliance regulations and to be paid to your employer/institution
